

Enhanced Demo: Adaptive Sizing + Inline Formulas

This text automatically shrinks to fit the bounding box. The default size is 12pt, and it only reduces if the text doesn't fit.

Simple formula

Einstein discovered $E = mc^2$ in physics.

Multiple formulas

Compare $F = ma$ with $E = mc^2$ and $a^2 + b^2 = c^2$ concepts.

Complex formula

The quadratic formula $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$ solves equations.

Formula at size 8: $E = mc^2$ scales proportionally.
Font 8pt:

Formula at size 12: $E = mc^2$ scales proportionally.
Font 12pt:

Formula at size 16: $E = mc^2$ scales proportionally.
Font 16pt:

Formula at size 20: $E = mc^2$ scales proportionally.
Font 20pt:
